PPCM Curriculum Mapping and the Unit Planner

PPCM IB Curriculum Mapping and the Unit Planner

What is the benefit of this session?

The purpose of the course is to develop participants' knowledge and understanding of the curriculum mapping and unit planner components of *SEQTA Teach*. All non-government schools in Australia are required to undertake re-registration every 5 years, and some form of vertical mapping of the curriculum is required as part of this process.

The Unit planner is designed as a high-level planning tool, to map out topics, adherence to syllabus, content, differentiation and assessments etc. and underpins the curriculum mapping facility. The curriculum mapping:

- enables teachers and school leaders to reflect on the vertical articulation of the written curriculum
- provides a horizontal view, allowing teachers to reflect upon common content and skills across subject groups in a particular year level
- provides a record of how the school organises the subject group through the courses offered in various subjects and disciplines

This reflection enables schools to identify gaps and/or overlap in their curriculum, which may require teachers to modify units and lesson planning.

Recommended Attendees

Curriculum Leaders, Deputy Principals, Directors of Teaching and Learning, Heads of Primary

Key Outcomes

- The purpose of curriculum mapping and the unit planner
- How to create unit planner templates
- How to create curriculum maps

Australian Professional Standards for Teachers ([AITSL](#)) addressed

2.2, 3.2, 3.6, 7.2
